

REAL ESTATE LISTING WEBSITE – BLACKBOX TESTING DOCUMENT

1. Introduction

What is Black Box Testing?

Black box testing only cares about the Product's final output. It doesn't depend on how the inside code works.

We apply this testing to the overall Website.

We also apply **Equivalence Class Partitioning (ECP)** to reduce test cases by dividing inputs into:

- Valid classes
- Invalid classes
- Boundary classes

Each class is represented by at least one test case.

2. Login Module (Buyer/Renter, Lister, Admin)
